Bed Bug Preparation Checklist

Client Name: _____

Service Address: _____

Phone Number: _____

#	Preparation Instructions	1st	2nd	3rd
1.	Wash all linens, bedding materials, clothing, stuffed animals, etc, in the highest allowable water temperature and dry on the hottest allowable heat setting.			
2.	All laundered items such as linens, clothing, stuffed animals, etc, should be placed in new black, heavy duty plastic bags or containers, sealed tightly with a zip tie and relocated to the living room.			
3.	All clothing items that cannot be laundered should be dry cleaned. We recommend leaving these items at the cleaners between the initial treatment and follow-up visit.			
4.	Remove all items from closets, including any items on closet shelves. Follow the procedure above for laundering all clothing. No items should remain in the closet.			
5.	Remove all miscellaneous items from dressers, night stands, chests, etc, and place them in plastic bags or sealed containers in the center of the room.			
6.	Vacuum floors, carpets and area rugs. Use the crack and crevice attachment around baseboards, bed frames, sofas and other furniture items. Discard vacuum bags or contents after use, outside your residence in a sealed garbage bag.			
7.	All luggage that has been used recently during travel must remain empty so that it may be inspected and treated as necessary.			
8.	Birds, cats, dogs, and humans must remain out of the home during treatment and at least a minimum of 4 hours after the treatment is complete. Fish, and reptile tanks must be covered or removed. Air filters and filtration systems for aquatic fish should be turned off during treatment.			
9.	All mattress and box spring covers must be removed from mattresses and box springs prior to our arrival unless you have previously installed an encasement that was specifically designed to control, prevent and eliminate bed bugs.			

10.	Crib, crib mattresses, and other baby furniture will be inspected and treated as needed.			
11.	Shoes should be placed in new plastic bags or containers, and sealed tightly. If shoes can tolerate a dryer cycle, first place them in the dryer on hottest cycle for 30 minutes. No shoes should be left in the closet.
